

Ref. T4/4.01

MSC.1/Circ.1002/Corr.1  
3 October 2005

**GUIDELINES ON ALTERNATIVE DESIGN AND ARRANGEMENTS  
FOR FIRE SAFETY**

**Corrigendum**

1 The Maritime Safety Committee, at its eightieth session (11 to 20 May 2005), considered a proposal to amend MSC/Circ.1002 to eliminate the requirement to include a reference to the approved alternative design and arrangements in the appropriate SOLAS certificate and, having noted that FP 49 had recommended a similar course of action, agreed that, to that effect, a corrigendum to the circular should be issued.

2 Therefore, the text of the corrigendum is reproduced as follows:

“Paragraph 7.4 (the title and the text) of the Guidelines, set out in the annex to MSC/Circ.1002, is deleted.”
